Workshop

Monday, 3 June  
08:00 - 12:00

## Perioperative intensive care

**\*\*IMPORTANT NOTICE:** access is limited to pre-registered delegates

### Learning objectives

This workshop, including lectures and interaction with the audience, aims at providing practical and updated information on how to take care of critically ill patients in the operating or recovery room. The session will focus on resuscitation of sepsis, acute respiratory distress syndrome (ARDS) in surgical patients, trauma, and acute abdomen.

Each topic in the programme will be presented as follows:

- Presentation and discussion of recent guidelines;
- Illustration with a clinical case;
- Discussion with the audience.

After attending the session, anaesthesiologists managing critically ill patients in the perioperative period will be able to manage organ dysfunctions according to the most recent knowledge.

*Target audience: Anaesthesiologists practising mostly or exclusively in anaesthesia but regularly managing critically ill patients in the perioperative period.*

### Chair:

Claude Martin (Marseille, France)

### Resuscitation of sepsis

Claude Martin (Marseille, France)

Andrea Cortegiani (Palermo, Italy)

### Acute respiratory failure/acute respiratory distress syndrome (ARDS)

Cesare Gregoretti (Torino, Italy)

Christian Putensen (Bonn, Germany)

### Severe trauma

Luca Brazzi (Torino, Italy)

Carole Ichai (Nice, France)

### Acute abdomen

Sharon Einav (Jerusalem, Israel)

Martin Martin-Loeches (Dublin, Ireland)
