USRAW5
Workshop

Monday, 3 June
09:00 - 12:00

Ultrasound guided regional anaesthesia workshop (5) - blocks of the trunk

**IMPORTANT NOTICE: access is limited to pre-registered delegates

Learning objectives

These half-day hands-on ultrasound workshops will focus on the basic skills in ultrasound techniques relevant to anaesthesiologists. Each workshop includes a short anatomical lecture followed by expert-led practice on living models and phantoms.

After the session, participants will have acquired the basic skills in ultrasound-guided regional anaesthesia of the upper and/or lower limb and/or the trunk.

The workshops will be run by the best available experts in ultrasound-guided regional anaesthesia from Austria, host country of Euroanaesthesia 2019.

Target audience: Residents, fellows, physicians interested in regional anaesthesia and chronic pain medicine.

Chair:

Gerhard Fritsch (Vienna, Austria)

Station 1: Quadratus lumborum blocks

Franz Josef Nierscher (Vienna, Austria)

Station 2: Pain blocks (facet joint blocks, n.occipitalis block, n.ilio- inguinalis and iliohypogastricus blocks)

Rudolf Likar (Klagenfurt, Austria)

Station 3: TAP and rectus sheath blocks

Johann Blasl (Vienna, Austria)

Station 4: PECS and serratus plane blocks

Eberhard Reithmeier (Feldkirch, Austria)

Station 5: Neuraxial blocks

Natascha Ahyai (Vienna, Austria)

Station 6: Paravertebral block

Jürgen Nawratil (Salzburg, Austria)
