SIMLAB1
Workshop

Saturday, 1 June
10:30 - 12:00

HIGH FIDELITY WORKSHOP 1

Challenging cases in anaesthesia – Crisis in the operating room: topic 1

**IMPORTANT NOTICE: access is limited to pre-registered delegates

Learning objectives

Four different sessions will be available and focus on different clinical topics:

1. Crisis in the operating room: topic 1.
2. Crisis in the operating room: topic 2.
3. Crisis in the ICU: focus on trauma patients
4. Crisis in the ICU: other critical situations in ICU

During these 90-min sessions, one or two challenging clinical scenarios will be reproduced in a fully immersive environment including a high-fidelity patient simulator (mannequin). Delegates will have opportunities to manage and/or observe these clinical cases. After each scenario, skilled instructors will provide constructive feedback during a debriefing session in which all participants will take part.

During these sessions, participants will:

- Understand the importance of non-technical skills
- Review and improve their knowledge in patient management in the clinical topic of the session (algorithms and clinical guidelines)
- Practice and improve technical skills related to the clinical topic of the session

Target audience: Residents, fellows and practitioners interested in improving their skills and knowledge in anaesthesia or ICU crisis management.

Chairs:

Georges L. Savoldelli (Geneva, Switzerland)
Dan Benhamou (Paris, France)
Rikke Vita Borre Jacobsen (Herlev, Denmark)
Carola Salem (Feldkirch, Austria)

Instructors:

Morgan Le Guen (Suresnes, France)
Domitille Dereu (Geneva, Switzerland)
Rikke Vita Borre Jacobsen (Herlev, Denmark)
