PERIC Friday, 31 May
Pre-congress 08:00 - 18:00
Course

Perioperative medicine in daily practice

****IMPORTANT NOTICE:** access is limited to pre-registered delegates

Learning objectives

This 1-day course will be divided in two parts. The morning session will focus on clinical care of major perioperative complications using case-based interactive sessions. Each session will:

- address one of the main perioperative complications after non-cardiac surgery or a current clinical hot topic;
- use a clinical case divided into pre, intra and post-operative management phases;
- use highly interactive methodologies via colour cards and voting with mobile phone technology;
- reference most recent evidence.

In the afternoon, participants will be able to choose between 2 alternative parallel sessions (both small group active learning sessions):

- Clinical care of complex perioperative cases (including cases submitted by participants) with case-based discussions;
- Perioperative management workshop with mini-project development.

At the end of the course participants should be able to:

- perform preoperative risk assessment and plan individualised perioperative pathways for high-risk patients;
- apply early postoperative strategies to reduce “failure to rescue”;
- identify and treat vital postoperative complications enhancing long-term survival;
- design a management plan for perioperative care of high-risk patients.

Target audience: Physicians involved in perioperative care of high-risk patients.

Chairs:

Bernhard Walder (Geneva, Switzerland)

Bernardo Bollen Pinto (Geneva, Switzerland)

Welcome and registration

Michael Hiesmayr (Vienna, Austria)

What is perioperative medicine?

Giovanna Lurati Buse (Düsseldorf, Germany)

What to do with my hypoxemic patient before and after surgery?

Bernhard Walder (Geneva, Switzerland)

My patient has high troponin after surgery. And so what?!

Bernardo Bollen Pinto (Geneva, Switzerland)

Coffee break

How and what to feed my patients with after surgery?

Michael Hiesmayr (Vienna, Austria)

How to get my patient under anticoagulants and antiplatelets safely through surgery? Help me!

Daniel Bolliger (Basel, Switzerland)

Far from the eye, far from the heart? Fighting for better outcomes long after the operating room

Michelle Chew* (Linköping, Sweden)

Lunch break

Small group active learning (parallel sessions):

GROUP A: Clinical care of complex perioperative cases (including cases submitted by participants) with case based discussions

GROUP B: Perioperative management workshop

Discussion of the cases and workshop with the whole group

Bernhard Walder (Geneva, Switzerland)

Bernardo Bollen Pinto (Geneva, Switzerland)

Wrap-up and discussion with experts
