

W	SIMLAB1 Workshop	Saturday, 1 June 10:30 - 12:00	HIGH FIDELITY WORKSHOP 1 Challenging cases in anaesthesia - Crisis in the operating room: topic 1 **IMPORTANT NOTICE: access is limited to pre-registered delegates	SimSpace 1 - High Fidelity Room
---	---------------------	-----------------------------------	--	---------------------------------------

Learning objectives

Four different sessions will be available and focus on different clinical topics:

1. **Crisis in the operating room: topic 1.**
2. **Crisis in the operating room: topic 2.**
3. **Crisis in the ICU: focus on trauma patients**
4. **Crisis in the ICU: other critical situations in ICU**

During these 90-min sessions, one or two challenging clinical scenarios will be reproduced in a fully immersive environment including a high-fidelity patient simulator (mannequin). Delegates will have opportunities to manage and/or observe these clinical cases. After each scenario, skilled instructors will provide constructive feedback during a debriefing session in which all participants will take part.

During these sessions, participants will:

- Understand the importance of non-technical skills
- Review and improve their knowledge in patient management in the clinical topic of the session (algorithms and clinical guidelines)
- Practice and improve technical skills related to the clinical topic of the session

Target audience: Residents, fellows and practitioners interested in improving their skills and knowledge in anaesthesia or ICU crisis management.
