

USRAW2
Workshop

Saturday, 1 June
14:00 - 17:00

Ultrasound guided regional anaesthesia workshop (2) – blocks of the lower limb

Harp Hall

**IMPORTANT NOTICE: access is limited to pre-registered delegates

Learning objectives

These half-day hands-on ultrasound workshops will focus on the basic skills in ultrasound techniques relevant to anaesthesiologists. Each workshop includes a short anatomical lecture followed by expert-led practice on living models and phantoms.

After the session, participants will have acquired the basic skills in ultrasound-guided regional anaesthesia of the upper and/or lower limb and/or the trunk.

The workshops will be run by the best available experts in ultrasound-guided regional anaesthesia from Austria, host country of Euroanaesthesia 2019.

Target audience: Residents, fellows, physicians interested in regional anaesthesia and chronic pain medicine.

Chair:

Gerhard Fritsch (Vienna, Austria)

Anatomical lecture

Georg Feigl (Graz, Austria)

Station 1: Fascia iliaca compartment block

Franz Josef Nierscher (Vienna, Austria)

Station 2: Saphenous nerve block

Eberhard Reithmeier (Feldkirch, Austria)

Station 3: Popliteal sciatic nerve block

Gerhard Fritsch (Vienna, Austria)

Station 4: Femoral nerve block

Manfred Greher (Vienna, Austria)

Station 5: Truncal nerve blocks below the knee

Robert Kronthaler (Salzburg, Austria)

Station 6: Proximal sciatic nerve block

Jürgen Nawratil (Salzburg, Austria)
